

AirLines

Almost every Web designer can attest that much of their work is repetitive. We find ourselves completing the same tasks, even if slightly modified, over and over for every Web project. Following a detailed website design and development process can speed up your work and help you understand your role in the web design project. The respectively work of web design have a different roles under given project design.

The project is describing regarding all about the Airline Reservation. Where user can easily search for the flite for booking. On which you can able to get the details about the different aircrafts. The design is totally related to the photoshop where every user has to design template related given design by using appropriate tools.

The web template has at least five level with Header, Menu, Images, Content and Footer Part.

The steps for design Template Structure:

Step 1: Create/Design same template look like under below using powerful tool Photoshop.

Step 2: Maintaining all layers with individual image and color combination.
